BUSD-BNB LP STAKED: 479.891

Harvest

Details ▾

For the purposes of this document, we select the ATR-BNB farming pair.

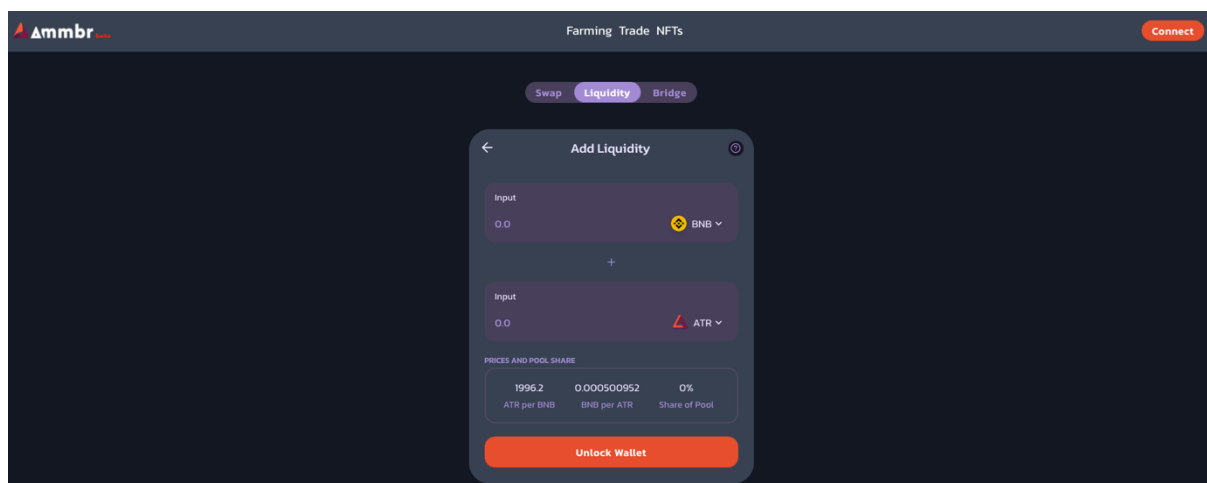

In the revealed Details panel, there are three external links.

- Get ATR-BNB LP
- View Contract
- See Pair Info

Click “Get ATR-BNB LP”, and that takes you to the page for adding liquidity to the ATR-BNB liquidity pool (LP). Once you do so, the liquidity pool smart contract will send you a Liquidity Pool (LP) token, which allows you to extract that liquidity again in future whenever you wish.

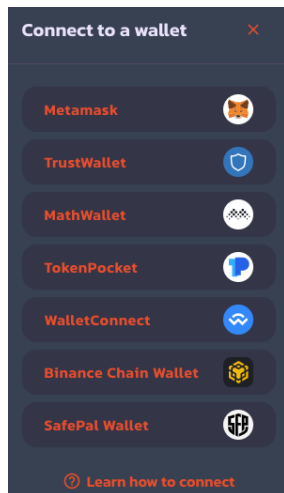

This LP token is what you stake in the ATR-BNB farm to earn ATR rewards.

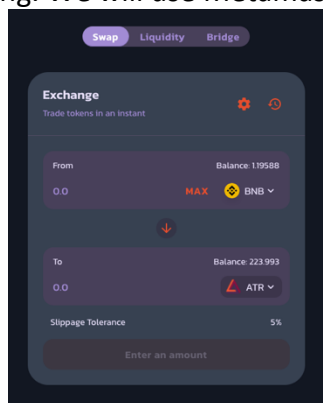

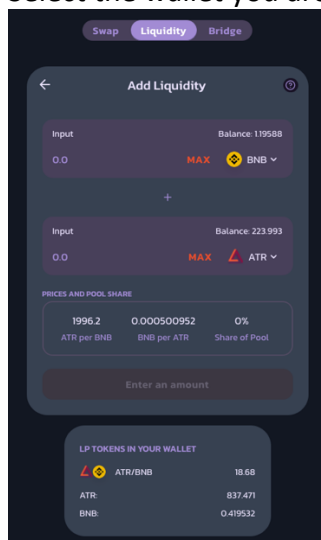

<https://trade.ammbbr.finance/#/add/BNB/0x3e3Db2042CF60Bf88E69B6FBE49a0066f7bf2559>

The first step is to click the “Connect” button at the top right-hand side of the screen to connect your wallet.

Select the wallet you are using. We will use Metamask for this document.

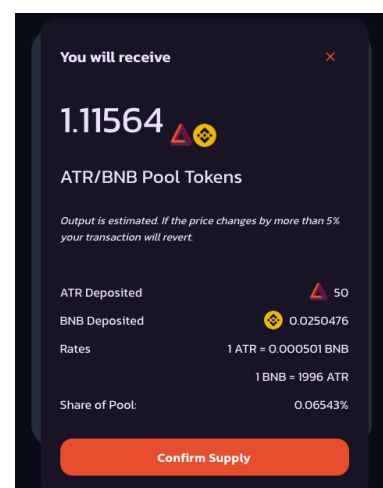

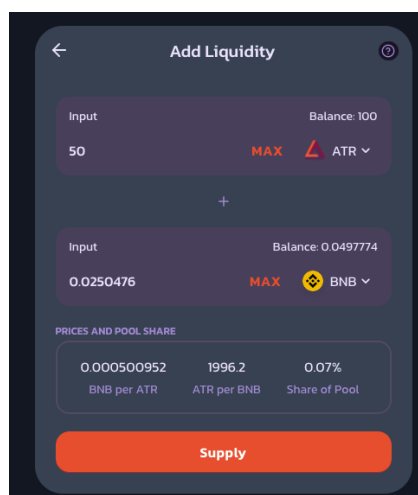

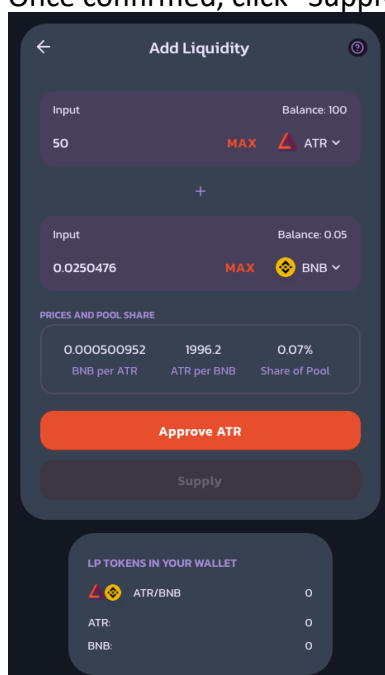

Please note, if you do not have ATR then you can obtain ATR by clicking on the “Swap” button and exchanging BNB (or Cake) for ATR.

Input how much BNB and ATR liquidity you wish to add and click “Approve ATR”.

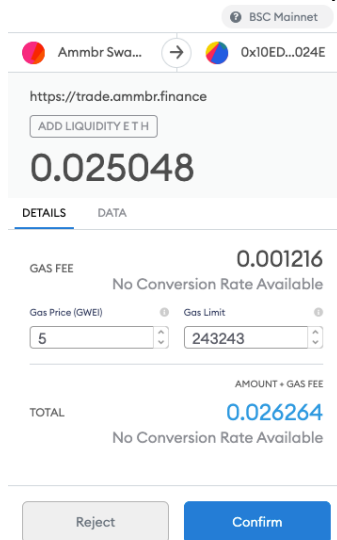

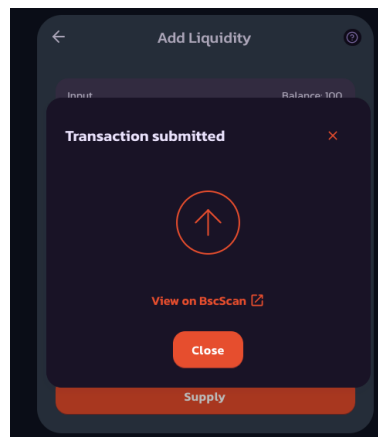

A wallet pop-up will ask you to confirm the approval – click “Confirm”.

Once confirmed, click “Supply”.

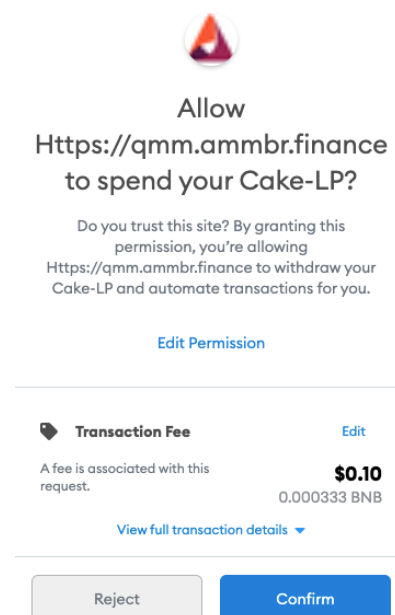

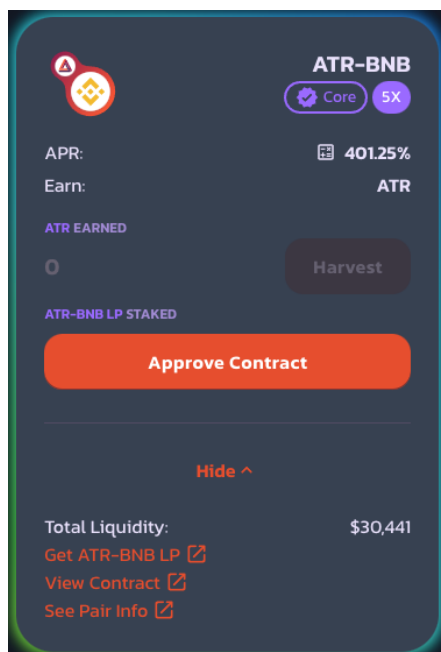

Then “Confirm Supply”

Your wallet will now ask you to confirm the transaction – click “Confirm”.

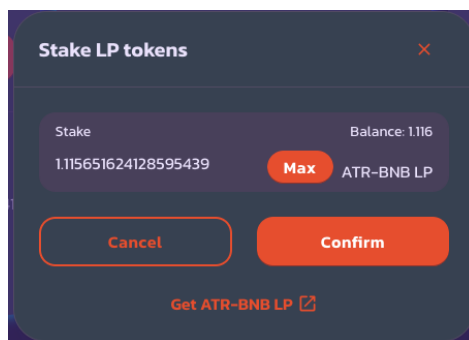

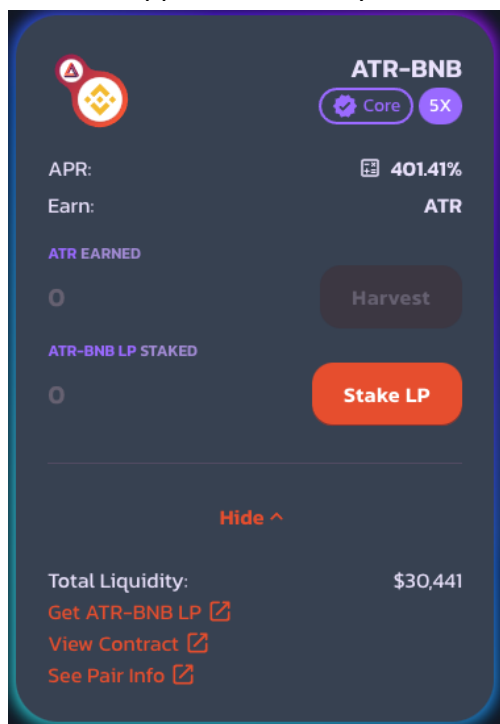

Wait for the transaction to confirm, and then you are ready to farm. Return to the farm.

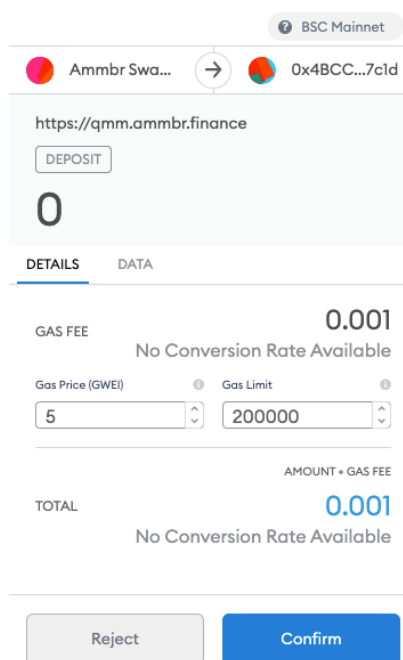

Click “Approve Contract” and you will again have to confirm this on the wallet pop-up.

Once the approval finishes you can click “Stake LP”.

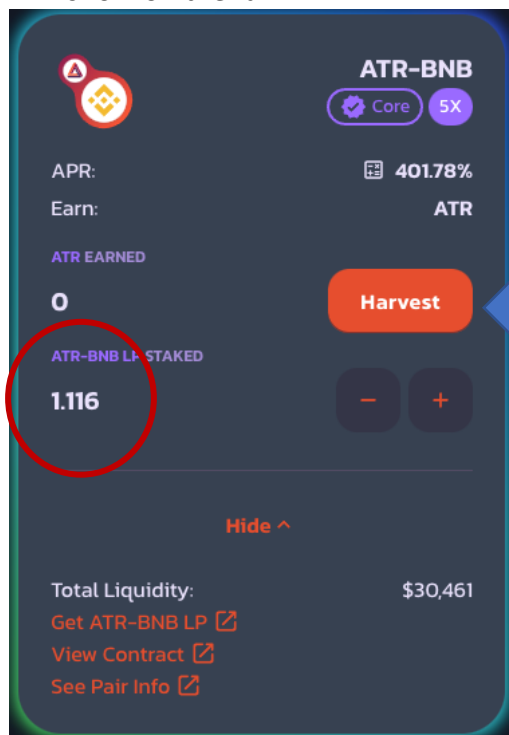

You can select how many LP tokens you wish to stake – typically “Max”.

Confirm the transaction in the wallet pop-up.

Once the transaction is complete your stake will show on the farm.

From time to time, you can harvest ATR by clicking “Harvest”.
